

Mr. Peter Bex

Peter Bex is Principal at and one of the founders of SIRA Consulting. The strategic focus of SIRA Consulting is policy development and implementation at all levels of government: Ministries, Provinces and Municipalities. SIRA's main areas of activity are Administrative Burden measurement and reduction, Regulatory Impact Assessment, policy evaluation and inspection methodologies. Based on its expertise in government regulations and licensing systems, SIRA Consulting also provides services for a number of major industries and professional organisations.

Peter has been working in the field of Better Regulation since 1998 and was involved in the development of the Standard Cost Model (SCM). He developed and implemented several methodologies to measure the impact of policies, regulations and inspections (E.g. SCM Administrative Burden for Citizens and the methodology to measure the Inspection Costs, The System of Standards for businesses). These methodologies were used in wide range ex ante and ex post evaluations.

Peter and his team developed the Cost driven Approach Regulatory Burden (CAR methodology) in close consultation with the Dutch Ministry of Economic Affairs.
